

LR-FB1015C 100x150cm Fire Blanket

with Soft Bag

Extended Fire Coverage

The large 100 × 150 cm format enables safer handling of broader flame areas, oversized pans, machinery housings and clothing fires.

Safe Fiberglass Construction

Produced from asbestos-free, flame-retardant fiberglass fabric that withstands extreme heat without releasing harmful materials.

Safe, Non-Hazardous Construction

The blanket is produced from asbestos-free fiberglass fabric that is flame-retardant and thermally insulating. This ensures safe use in domestic and commercial spaces without releasing harmful materials during exposure to heat.

Rapid Emergency Deployment

Bright red soft bag with twin pull straps allows instant access and simple use by trained or untrained personnel.

Product Overview

The LOREX LR-FB1015C Fire Blanket is a large-format professional fire-suppression solution designed for rapid intervention in kitchens, workshops, laboratories, industrial environments and commercial buildings. Its generous 100 × 150 cm fiberglass surface allows users to safely smother flames on larger equipment, worktops, waste bins or burning clothing by cutting off oxygen and reducing heat at the source.

Manufactured from non-asbestos, flame-retardant fiberglass fabric, the LR-FB1015C provides dependable thermal protection while remaining safe for indoor use. The material does not emit hazardous fibres when exposed to heat, making it suitable for public spaces, hospitality venues and industrial facilities.

Supplied inside a high-visibility red soft textile bag, the blanket is easy to locate during emergencies and can be wall-mounted or stored close to risk areas. Dual pull straps ensure quick, controlled deployment even under stressful conditions, while reinforced stitched edges enhance durability for long-term service.

Designed for professional installations where wider fire coverage is required, the LR-FB1015C offers an effective first-response tool that helps limit damage, protect occupants and prevent small incidents from escalating into major fires.

LR-FB1015C
100x150cm Fire Blanket

with Soft Bag

Parameter	Specification
Model Code	LR-FB1015C
Product Description	Fire Blanket with Soft Bag
EAN	8697806161541
Dimensions	100 × 150 cm
Fabric Weight	430 g/m²
Thickness	0.4 mm
Maximum Temperature Resistance	550 °C
Material	Flame-retardant fiberglass fabric
Standards Compliance	EN 1869:1997
Blanket Colour	White
Pull Straps	2 pcs
Bag Colour	Red
Bag Type	Soft textile bag
Bag Dimensions	23.5cm × 16cm × 3.5 cm
Total Weight	0.9 kg
